

First semester 2021 / 2022

Week 2

4th Pry

Information and Communication Technology

Sahar Mohammady

ICT Definition

Information:

Refers to the Knowledge obtained from reading, study and research.

Communication:

The process of transmitting and exchanged information between individuals.

Technology:

Application used to solve problem

Sahar Mohammady

Impact of ICT in our Daily Lives

For Students

- 🧵 Improve performance through discovery learning
- 🧵 Collaborate with your group.
- 🧵 Access information online.

Active Explorer

FIRST LESSON

Sahar Mohammady

Who is he?

Sahar Mohammady

Who is he?

Albert Lin

A famous **archaeologist** uses modern tools to explore archaeological sites without digging.

Sahar Mohammady

Who is he?

He is A famous **archaeologist** uses modern tools to explore archaeological sites without digging.

Sahar Mohammady

The importance of Technological tools for archaeologists :

- ▶ Save time and effort
- ▶ Speed to get result
- ▶ Explorer before digging
- ▶ Dig for long distance
- ▶ Conduct a survey over the ground to determine the places they want to search

What are the most important tools that archaeologists use?

1

Satellite: Collect clear images

Sahar Mohammady

What are the most important tools that archaeologists use?

2

Drone: Helping us find sites without digging

Sahar Mohammady

What are the most important tools that archaeologists use?

3

GPS: Global Positioning System (search for a place using satellites, then start to search under the ground)

What are the most important tools that archaeologists use?

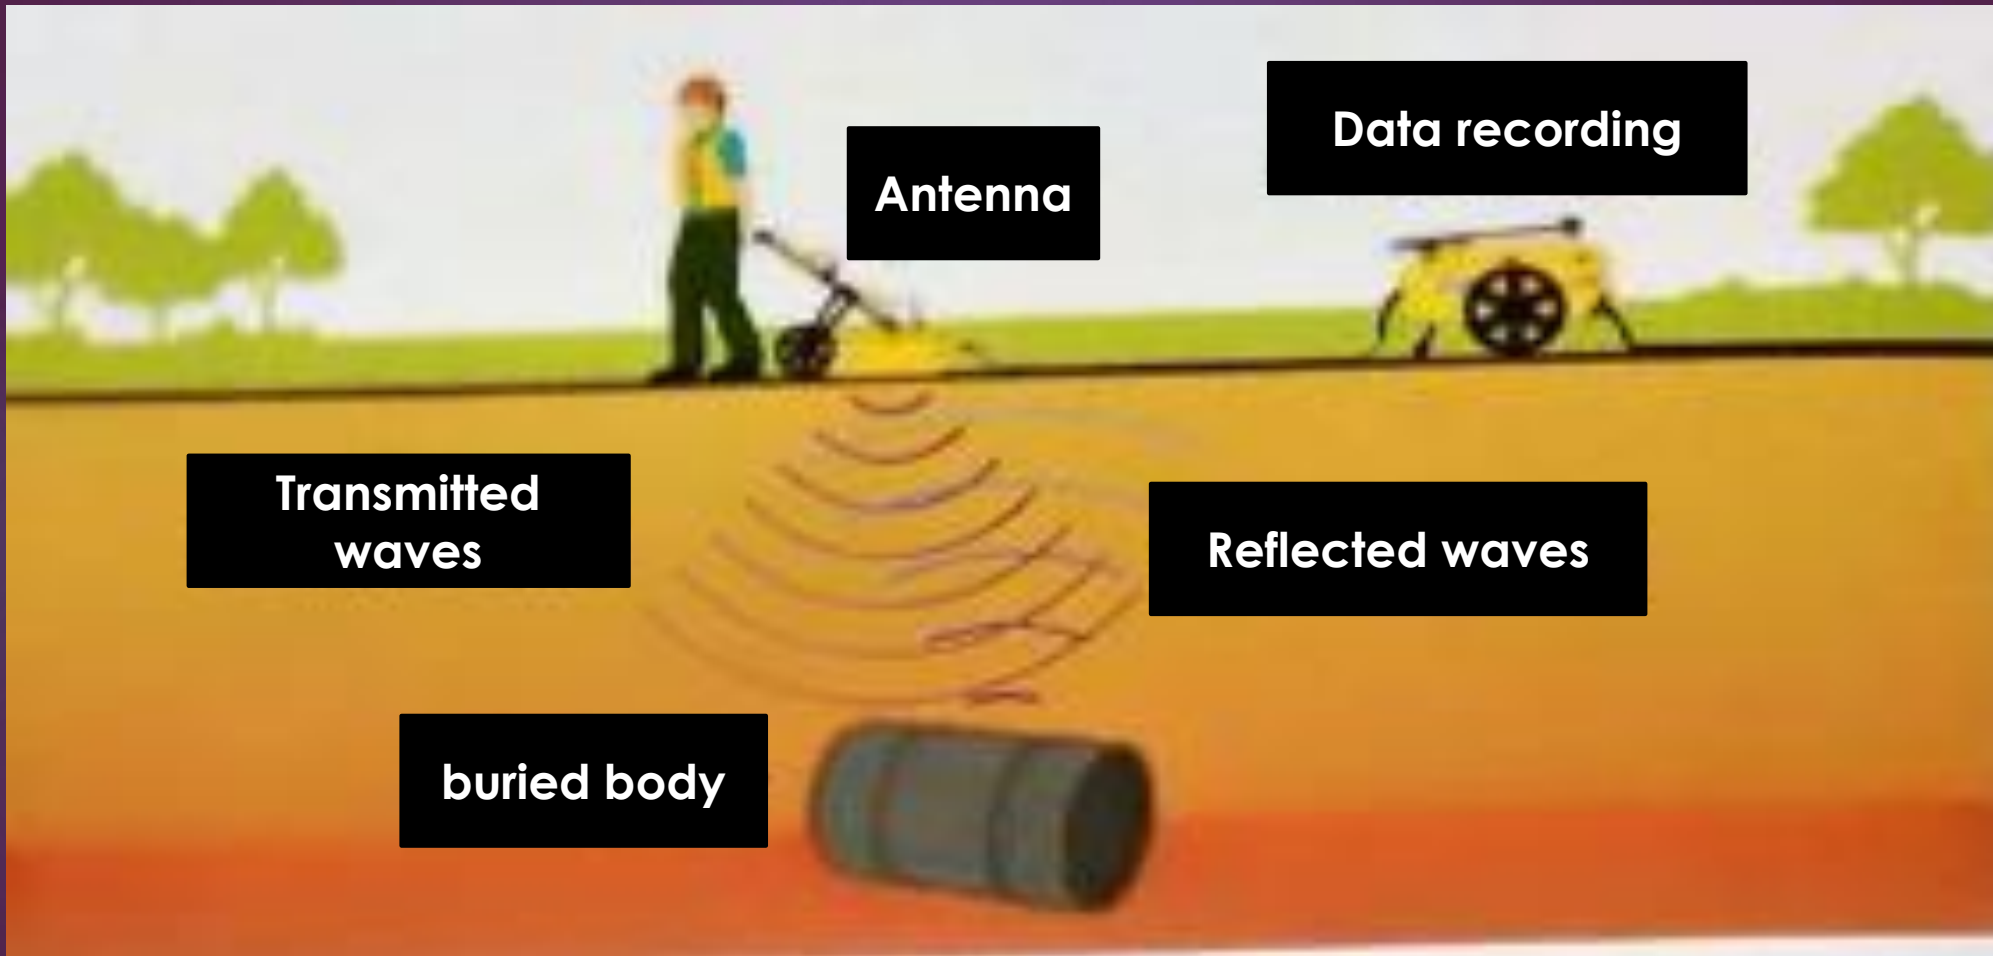

4

magnetometer: A device that measures magnetic field (direction& strength)
To Find minerals in the ground

Sahar Mohammady

4

Ground-penetrating radar (GPR): It is used to find buried objects underground.

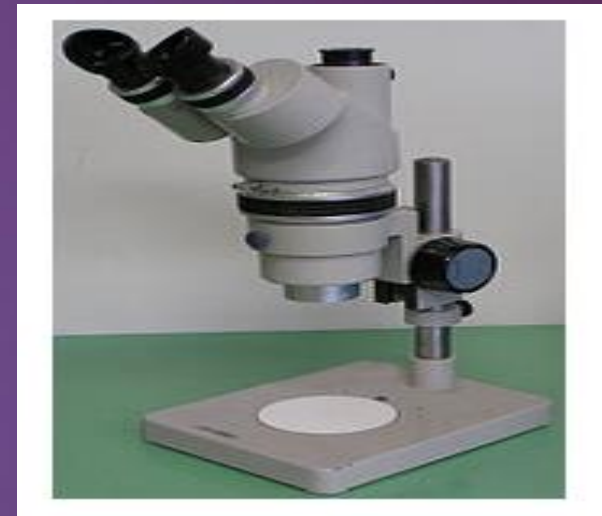

Sahar Mohammady

What are the most important tools that Scientists use?

A **telescope** is a device we use to make objects appear closer)

Create clear picture of an atom

Sahar Mohammady

What are the different types of technology used to explore the earth?

- ▶ Tools above the ground
- ▶ Tools under the ground

Which technological tools do **archaeologists** use above ground?

satellite

GPS

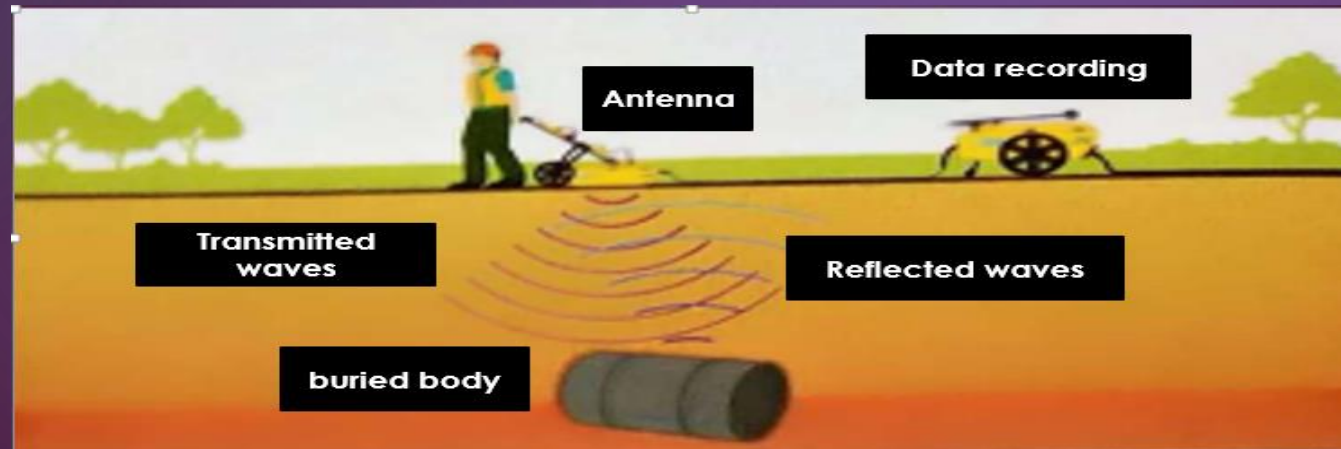

Drone

Which technological tools do **archaeologists** use under the ground?

magnetometer

Ground-penetrating radar
(GPR)

Sahar Mohammady

What do archaeologists do when they do not know where to dig?

- ▶ Use drone
- ▶ Satellites
- ▶ Ground-penetrating radar (GPR)

Which tool did Albert use?

Tablet

How did he see what trees hided?

By using **Augmented reality platform** which built to get hidden data, it should be able to tell us what's beyond the trees by Creating a map by lasers in the sky point to find lots of treasures

Sahar Mohammady

Remember

What are the most important tools that archaeologists use?

Satellite

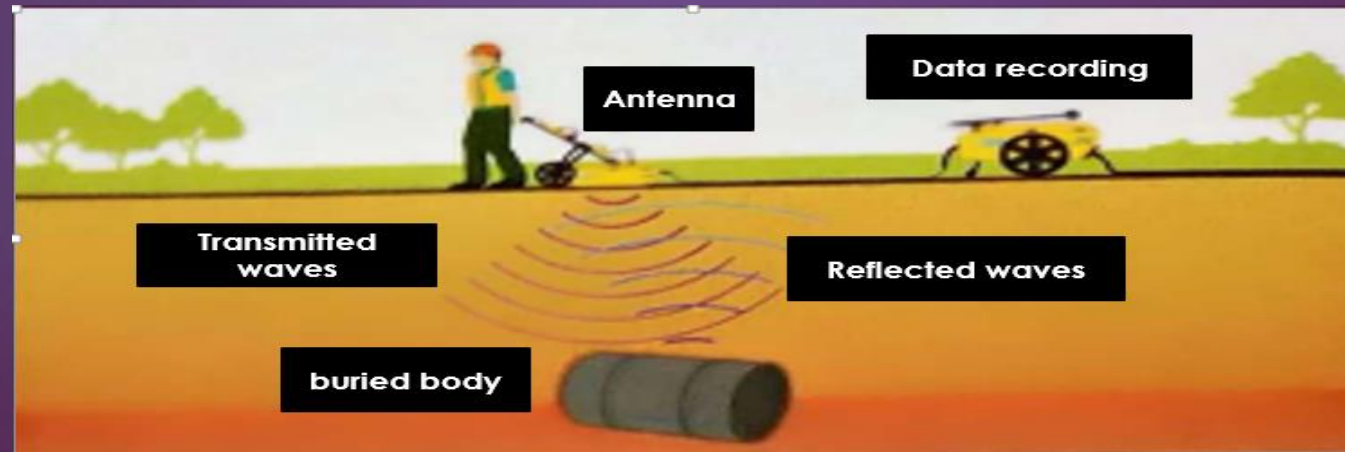

magnetometer

GPS

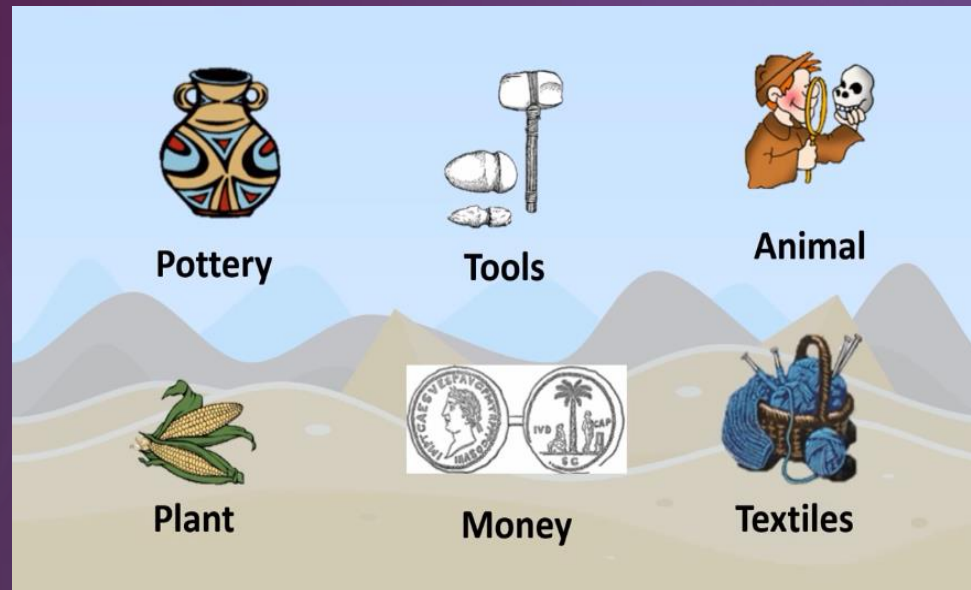

Drone

GPR

What can **archaeologists** find using these tools?

Cities
underground

What are the most important skills to an engineer?

- ▶ Teamwork
- ▶ Creativity
- ▶ Problem solving
- ▶ Logical Thinking

What are the most important skills to an **archaeologist** ?

- ▶ **Teamwork**
- ▶ **Update to technology**
- ▶ **Creativity**
- ▶ **Problem solving**
- ▶ **Logical Thinking**

Which tool can you use in this case?

You want to see if there are coins under the ground.

magnetometer

Which tool can you use in this case?

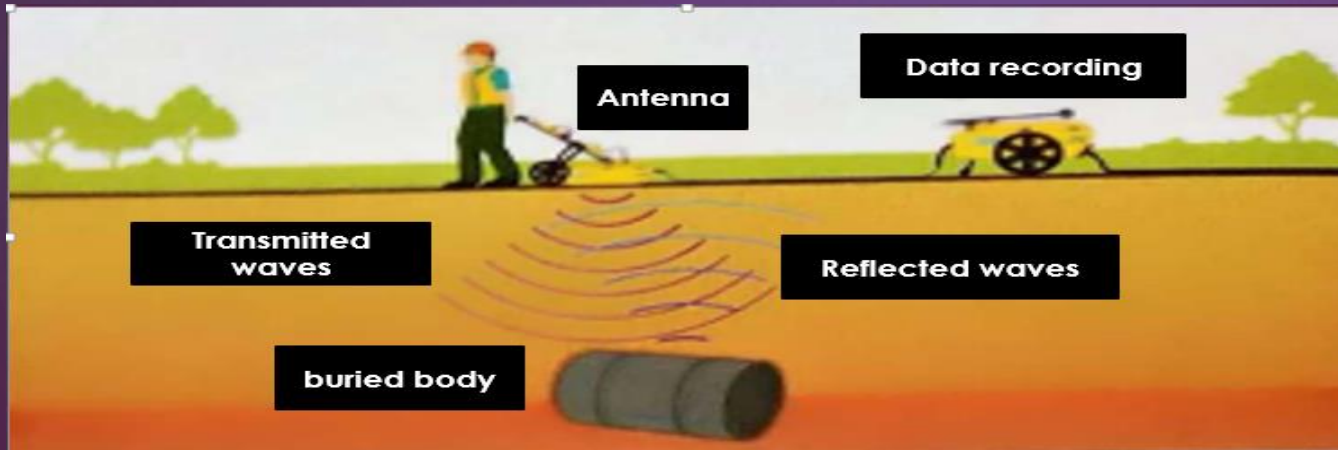

Your friend sent a message that he lost the way and you try to find him.

GPS

Which tool can you use in this case?

You want to see if there is an ancient building under the ground.

Ground-penetrating radar
(GPR)

Sahar Mohammady

Class Activity

Divide students into groups then discuss

Mr Albert Lin relied on his engineering experience while practicing his work as archeologist try to think about other fields that could be helpful to archeologist.

Class Activity

Divide students into groups then discuss

After 50 years from now what are the technology changes that will happen? And how these changes will help archeologists?

Think and answer

Imagine that you will go on expedition
archeology trip to find buried city in desert
what are technology tools you will use?

Write a short paragraph start with To embark
on our expedition we will need

Thank you

Wait for next lesson

Sahar Mohammady

Technology and its historical development

Lesson 2

Sahar Mohammady

Technology over Time

Lesson 2

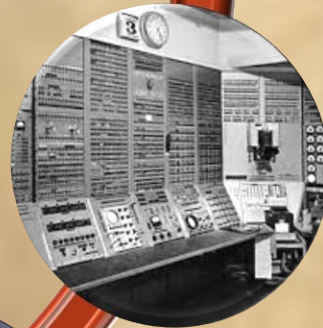

Pre-Mechanical Revolution Era

عصر ما قبل الثورة الميكانيكية

The era of mechanical revolution

عصر الثورة الميكانيكية

The era of the electric revolution

عصر الثورة الكهربائية - الميكانيكية

The era of electronic revolution

عصر الثورة الالكترونية

Technology and
Its

historical development

Sahar Mohammady

1

Pre-Mechanical Revolution Era

عصر ما قبل الثورة الميكانيكية

Time	3000 BC to 1450 AD
Communication between people	<p>1. Through pictures and graphics as it was in hieroglyphic writing.</p> <p>2. letters and numbers in later stage.</p>
Documents	<p>Lots of information about the agreements concluded and which represent important documents (you can find on the internet / EKB)</p>
Importance of documents	<p>It presented an essential role to understand History</p>
inventions	<p>Papers / ink pen / counter</p>

Sahar Mohammady

2

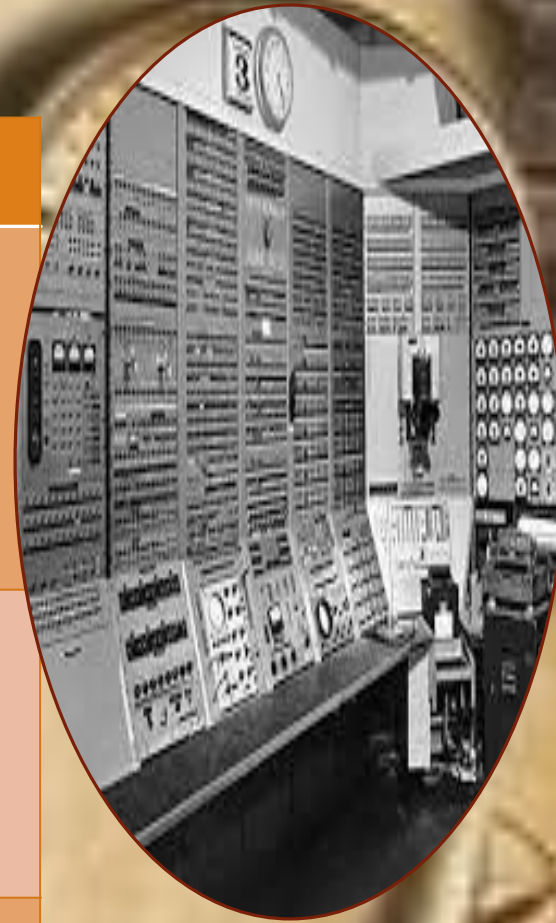

The era of mechanical revolution

عصر الثورة الميكانيكية

Sahar Mohammady

Time	1450 AD to 1840 AD
Communication between people	<p>printing technology (printing books).</p> <p>-appearance of pascalen the first version of calculator.</p>
Documents	<p>Recording and sharing more information (this is the beginning of technology revolution)</p>
Importance of this Era	<p>It considered the beginning of technology revolution</p>
inventions	<p>Printer/ calculator / typewriter</p>

Time

1840 AD to 1940 AD

Communication
between peopleTodays communication methods
(the first use of electricity)

inventions

Phone / phone lines/ the first digital
computer/ recorderDescription of
the first computerits height was 8 Feet, 50 feet length
and width 2 feet, While its weight
reached 50 tons.

Time

1940 AD till now

Features of this Era

- The era of information revolution
- Amazing inventions and achievements

Communication between people

- Connect a lot of people (email + SMS) immediately.
- indicate places allover the world(GPS)

inventions

computer / laptop / satellite/ GPS / word processing

What are the technological tools
that help people to contact each other?

Smart phones
WhatsApp
Face book
SMS

Sahar Mohammady

How do you use technological tools at school, home and society?

At School :

- Smart board (e-learning)
- Data Show (videos – presentations)

At Home :

- Social plat form to contact each other
- Search engine
- YouTube
- laptop or Pc (learning / playing / work)

Society:

Digital Government

Sahar Mohammady

Q3. Complete the table:

1.Pre-Mechanical Revolution Era

2.The era of the electric revolution

3.The era of the mechanical revolution

4.The era of the electronic revolution

a. Printer, calculator and typewriter.

b. Satellite, smart phone, GPS, computer and word processing

c. Ink pen, pencils, papers and counter

d. Phone ,phone lines and recorder

Dates	Technology Era	inventions
3000 BC to 1450 AD	1	c
1450 AD to 1840 AD	3	a
1840 AD to 1940 AD	2	d
1940 AD till now	4	b

Q4.think: then complete

Sahar Mohammady

Q4.think: then complete

Sahar Mohammady

Activity

A wise text that has a definitive secret of great importance on a green dress and wrapped in blue leather.

	Trial 1	Trial 2	Trial 3
Write on paper			
Type using mobile			
Type using computer			

Q5. which communication method you will use in these situations:

1. Your friend asking you if you can hang out together and you need to send him a response saying “yes”.

SMS

2. Your grandma lives away from you and you would like to tell her about school and what you will do when you reach her?

Chatting on social platforms

3. You would like to send your friend short message wish him happy birthday.

SMS

Sahar Mohammady

Q5. which communication tool you will use in these situations:

1. What are the technological tools at home? How do you use?

- Smart phones (Contact people / search)
- PC or laptop (learn / work /play)

2. What are the technological tools you would like to use in the future?

- Robot at my home
- car without driver

Sahar Mohammady

Thank you

Wait for next lesson

Sahar Mohammady

Components of Computer

Lesson 3

Sahar Mohammady

Computer

Computer is an electronic device which has the ability to store data and information which you can **retrieved** and **process** them.

Computer uses:

- Writing documents
- Send Email
- Surfing the internet
- Playing Games

Sahar Mohammady

Computer shape and its components

The shape and components of computer is different according its model

Forms of Computer

PC

Laptop

Tablet

Touch Screen

Components you need to use computer

Key board

Used for typing and sending commands to the computer

Mouse

Its size suitable to your hand, it allows you to move objects easily.

Screen

Which allows you to see what you can do on your computer.

Speakers /
Camera / Mic

To hear / to be seen by others / to be heard by others.

Sahar Mohammady

Computer operation

Users enter **Data** via keyboard and other devices, then we get **information** on the screen.

Input Data and
instructions

Process

Output
Information

Sahar Mohammady

Components Of Computer

in put units

unit's Name	Data Type
keyboard	Letters and numbers
Mouse / screen touch	A guide to select objects
Microphone	Sound and music
Camera	Pictures or video files
Scanner	Text and Pictures from Paper

Out put units

unit's Name	Data Type
Screen	Visual information (Text /Pics/video files)
Braille terminal	Written text for blind people in Braille way
Speakers	Audio information
Speech Synthesizer	
Printer	Text and pictures on paper

Sahar Mohammady

You're the main component
of using computer

Computers are effective
when
the entered Data is useful

Be careful you may make a mistake:

Some users may connect devices in a wrong way or misuse of them.

Sahar Mohammady

Questions

Put the right name:

1.keyboard

3.mouse

5.Printer

2.Scanner

4.Screen

6.speaker

Write the component name

Function	Component Name
Interactive with information by selecting from the screenMouse.....
View visual information (text/pics/video files)Screen.....
Enable user to enter pics to computerCamera.....
Enable user to enter text to computerkeyboard.....
Enable user to enter text and pics to the computer from paperScanner.....
Enable user to get out text and pics from the computer to paperprinter.....
Enable user to enter audio parts to computerMic.....
Enable user to get out audio parts from computerSpeakers.....

Computers can help
People of determination

Write the name
of the right
Component:

1.This component enables blind people to use
computer **Braille terminal**

2.This component enables dumb people to talk
Speech Synthesizer

Sahar Mohammady

Think

1. Do your family and friends use computers? For what?

2. When do you need to use these components:

- Camera:.....
- Mic:.....
- Speakers:.....

3. In your Opinion which is more useful printer or scanner?

Sahar Mohammady

Think

Suggest some devices that can use computer component ?

Sahar Mohammady

Thank You!

Wait for next lesson

Sahar Mohammady

4th pry first Term

SOFTWARE AND OPERATING SYSTEM

Fourth lesson

Sahar Mohammady

HOW DOES COMPUTER WORK?

Suppose you will type a report to
your school
What will you do? →

1. Open your computer
2. Open typing program like MS Word (by clicking on the name of the program it gives command to the computer's operating system to access and open the program)

Operating system is a type of
Software

Sahar Mohammady

HOW DOES COMPUTER WORK?

Suppose you will type a report to
your school
Inside Computer? →

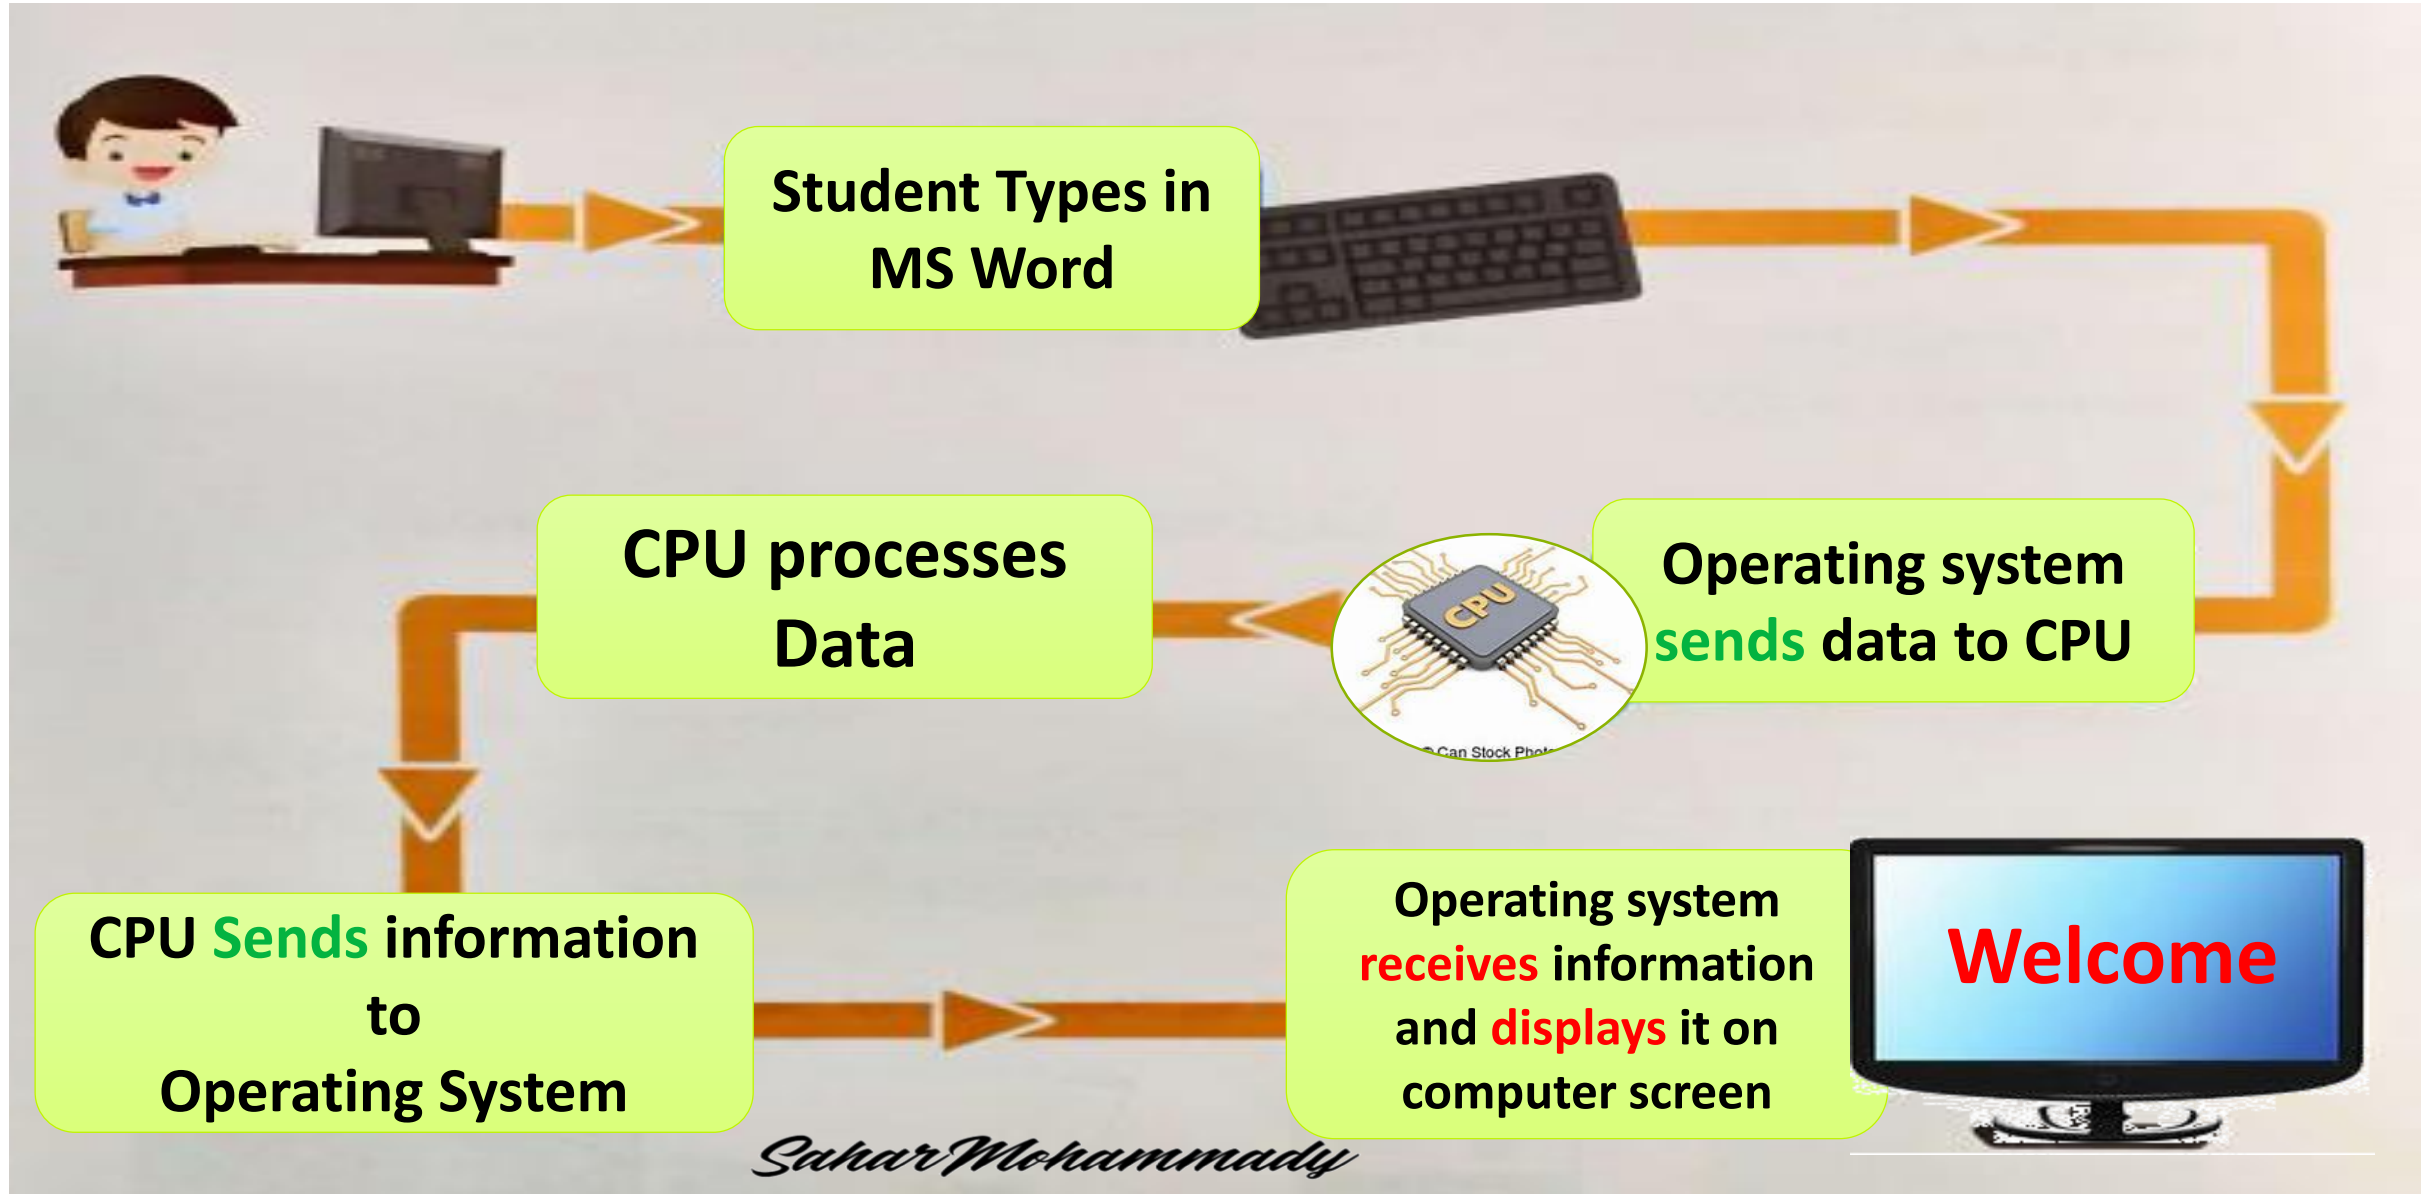

Operating system sends commands to **CPU**
(one of computer Component) It controls the
processed Data and the way of processing.

Sahar Mohammady

INSIDE COMPUTER

NOTE

If any problem happened to MS Word before operating system sends commandos to CPU you may **lose** your work **so**, remember to save your work regularly.

REVISE

What is the difference between software and devices?

Tell some one How does computer work?

Q1

COMPLETE

MS Word

Power Point

Gaming Apps

Windows

Google Chrome
browser

Keyboard

Screen

CPU

Devices	Operating System	Software

Sahar Mohammady

A

B

C

D

1.Open the program and start typing.	C
2.This device receives information and sends it to the operating system which translate this information.	A
3.CPU receives information from Operating System and processes this information to send it back to operating system.	D
4.After Operating system sent this information to the program. The program displays information on the screen.	B

THANK YOU

Sahar Mohammady

4th pry

SUPPORTING PEOPLE OF DETERMINATION

LESSON 5 FIRST TERM

Sahar Mohammady

ASSISTIVE TECHNOLOGY

How can Technology help people of determination?

Assistive Technology:

Technological tools that help people of determination

Assistive Technology function:

Help people of determination to do difficult work That can't do.

Albert Lin has an amputated leg, but he didn't give up and still in his successful way and he still travels around the world by using prosthetic leg (Assistive Technology)

Sahar Mohammady

He is still doing every thing he used to do

EXAMPLES OF ASSISTIVE TECHNOLOGY

1. HEADPHONES

Function:

Help people who suffer from hearing problems to hear well.

Technology:

- New styles are connected to mobile phone.
- There are some apps that can control the headphone through mobile phones

2.Screen Magnification Software

Function:

Help people who have suffer from **visual impairment** by magnifying everything on computer screen (**words/images**)

3.Alternative Communication Software

Function:

Help people of determination to communicate with others.

Technology:

There are some software can convert written text to speech and vice versa.

4.Sport Equipment

Function:

Help people of determination and amateur who have lost one of their limbs to climb mountains.

Technology:

-Assistive Technology can help them carry out normal and extraordinary activities.

5.Soccer Balls

Function:

It makes sound to help people of determination.

6.Tricycles

Function:

It can operated by hands to help people of determination.

Sahar Mohammady

Revise
&
Discuss

Q1.What are the technological tools that help **people of determination**?

Q2.Away from Technology how can we help **people of determination** to live better life ?

Sahar Mohammady

Write the benefit of each tool:

1. Soccer Balls (make sound)

.....

2. Mobile phones with big buttons

.....

3. HeadPhones

.....

4. Screen Magnification Software

.....

5. Tricycles

.....

Stephen Hawking was a famous scientist he used to use **Assistive Technology** (speech synthesizer) to communicate with others.

Rearrange the steps in the right order:

- a. When I have a sentences the computer sends it to **speech synthesizer**.
- b. I look at the screen then I see the words on it.
- c. I press on a key with my hand, to select the words I need to write a sentences.
- d. The Technique of **speech synthesizer** converts words into speech which help others to hear what I want to say.
- e. I can't talk so I communicate with others by using **computer** system built in my private Wheelchair.

2

3

4

5

1

Technology can help people of determination to do the same activities which normal people can do.

Read and answer:

Mention three activities which you like to do?	What is the difficulty of these activities for people of determination to do ?	What are the technological tools that can help people of determination to do these activities?

Sahar Mohammady

THANK YOU !

WAIT FOR NEXT LESSON
